

convex_hull_trick::
test::test_less

```
graph LR; A["convex_hull_trick::  
test::test_less"] --> B["tree::assert"]
```

A diagram showing a call from a function in the `convex_hull_trick` module to a function in the `tree` module. The source function is `convex_hull_trick::test::test_less`, and the target function is `tree::assert`. A blue arrow points from the source to the target.

tree::assert
